

2-day In-person Seminar:

Safety Management and OSHA Compliance

-  Washington, DC
-  September 7th & 8th, 2017
-  9:00 AM to 3:30 PM

Keith Warwick

President, Patty & Keith Inc.

Keith Warwick is a licensed professional engineer in California and has been licensed in Tennessee, Indiana, Illinois and New York when he worked in those locales. He is owner and President of PATTY & KEITH INC. Keith is a graduate of the University of California at Davis with a degree in Civil Engineering. He has 35 years of environmental compliance,

Overview :

Development of a safety program to save costs, delayed schedules and the human cost of injury or death.

Safety management guidelines and techniques for the engineering, construction, and scientific professions.

Includes costs of preparing the necessary safety documentation.

It will emphasize using multiple techniques for each safety task.

It will discuss costs of professional services from consultants.

There will be brief exercise each day.

The course will discuss the costs of accidents in an occupational environment.

It will discuss the costs of operating industrial and construction projects safely in accordance 29 CFR 1910 and 29 CFR 1926.

Discussion of how Environmental releases and safety violations can impact your profitability.

How accidents affect production schedules and result in civil or in some cases criminal action. Multiple safety violations can cost your company hundreds of thousands of dollars.

Fall protection

Lecture 4: How to conduct inspections and audits

Day Two

Lecture 1: Senior management's role in a safety management program

Lecture 2: Confined space safety

Lecture 3: Construction safety

Lecture 4: Development of a safety management program

Why you should attend

An OSHA violation can result in significant fines and suspended operations

A Safety Management Program is a necessary and cost effective endeavor.

Lack of a safety program leads to additional costs, delayed schedule and the human cost of injury or death.

This course will present safety management guidelines and techniques for the engineering, construction, and scientific professions. This will include costs of preparing the necessary documentation. It will emphasize using multiple techniques for each safety program. It will discuss costs of professional services from consultants. There will be at least one brief exercise that students will conduct on their own with guidance from the Instructor.

Areas Covered in the Session:

- Chemical safety
- Developing a safety management program
- Safety aspects of environmental compliance
- Confined space safety
- Introduction to OSHA
- Office safety
- Hazardous communications
- Safety Data Sheets
- DOT hazardous material classes and divisions
