A holder of the EU GDPR Practitioner (EU GDPR P) qualification which is ISO 17024 accredited and issued by the International Board for IT Governance Qualifications (IBITGQ), she now works with businesses to help them with GDPR compliance and training.

### Overview :

On 25th May 2018 the EU-GDPR becomes effective, this date has been set to give organisations time to prepare and comply with the regulations. This may seem to be a long way off, but for most organisations there is a lot to be done.

With the escalation of data breaches, the sooner data is safe guarded the better. Often a data breach is not discovered for months, sometimes six months, implementing new policies, security systems, negotiations with suppliers and training people in an organisation will take time. The sooner you start the more time you have to make a good decision on the options you face.
